!! PRESS RELEASE !!

THE GROOVE TUBES SILVER SERIES

Groove Tubes is pleased to announce our "Silver Series" of vacuum tubes. Groove Tubes have always been sold in performance matched sets of Duets and Quartets and have attained the World's highest reputation after nearly 25 years of hard work and 1,000's of satisfied customers.

However, many of our customers have expressed a desire to purchase Groove Tubes as unmatched singles and also at a reduced cost. We have decided the time was right to satisfy these numerous requests. The new Silver Series does not replace our original Groove Tube line, why mess with a winner, but compliment it nicely.

The new GT Silver Series tubes are still carefully tested on our exclusive GT computer based tube testers, which weed out tubes with grid leakage, high gas content, hum and/or excessive noise. All Silver Series tubes are guaranteed for 3 months to meet or exceed the typical factory specs. Most importantly, they will typically sell for up to 50% less than the premium GT tubes of the same model.

Silver Series tubes are silk screened with a Silver epoxy based ink, and we also package them in new Silver and White boxes for easy display and storage. Available from February 2003 at Groove Tube Dealers everywhere
